What's so distinctive about Ash Temple service?

At Ash Temple, we recognize that when you need supplies, or your equipment malfunctions, you can't afford to wait. You need fast, efficient response.

That's why it's good to know you can rely on the people at Ash Temple.

Ash Temple's team of experts is composed of people who combine seasoned experience with the latest knowledge of industry developments.

Our service commitment is a combination of three important elements:

- An outstanding dedication to promptness and efficiency on the part

of all our staff from coast-to-coast.

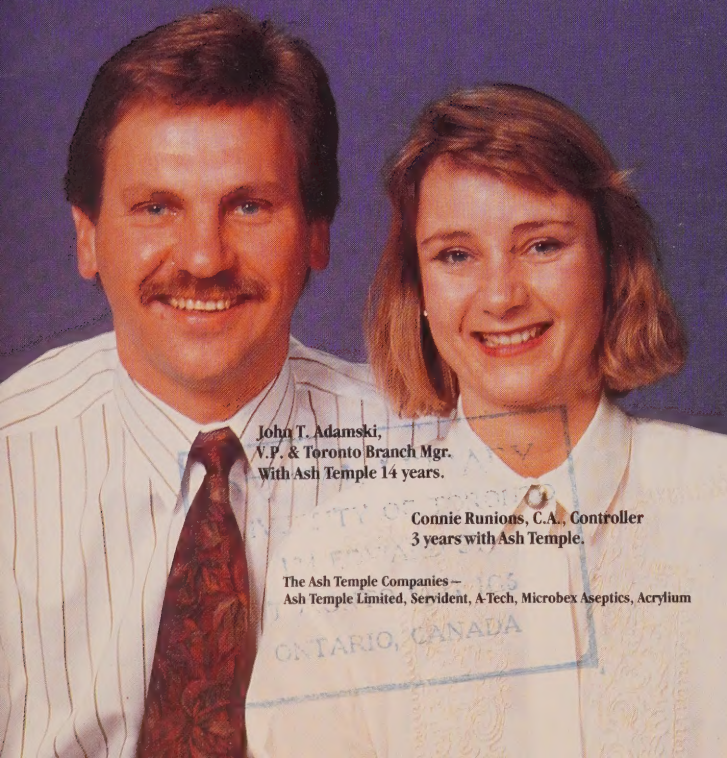

- A distribution infrastructure devoted to providing consistent reliability with high order fill rates unrivalled in Canada.
- An enviable reputation earned over years of service to the Canadian dental profession.

Ash Temple can provide the service you require from within your local community.

OUR ACADEMY

The ACADEMY OF DENTISTRY, formerly the Toronto dental society, has been functioning continuously since 1890. It has provided leadership and service to both the profession and the community, and will continue to do so in the future.

The OBJECTS of the Academy are:

1. Advancement of the art and science of dentistry.
2. To promote the highest ideals of dental practice.
3. Cultivation of harmony and good fellowship among its Fellows, and among the members of the dental profession generally.

Some of the specific services provided are as follows:

1. The Annual WINTER CLINIC.
2. After hours EMERGENCY TREATMENT service for the public.
3. The Annual WINTER CLINIC/INFORMATION BOOK, a directory of dental organizations.
4. The LADIES' AUXILIARY, which provides support for worthy dental projects, and various fellowship activities.
5. PUBLIC RELATIONS, a secretary to answer the public's queries and complaints.
6. An ELECTED COUNCIL, representing all Metro Toronto dentists and their local component societies.
7. CO-ORDINATION of dental and fellowship functions within Metro Toronto.
8. DENTAL MEETINGS with excellent programs and clinicians.
9. Assistance in formation of new STUDY GROUPS.
10. HONOURARY MEMBERSHIP to recognize outstanding dentists.
11. Fellowship activities such as the Annual GOLF TOURNAMENT, CURLING BONSPIEL, and SKI DAY.
12. MEDIATION services for the public.
13. COMMUNICATION with dental auxiliary organizations.
14. Provides an ASSOCIATE PLACEMENT service.

THIS IS OUR ACADEMY.
KEEP IT STRONG.
SUPPORT IT, ENJOY IT.

GREETINGS

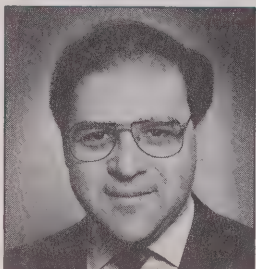

GODFREY BEBER,
D.D.S., B.Sc.D. (Anaes)

President, Toronto Academy
of Dentistry

KEN HERSHENFIELD,
D.D.S., M.Sc.D.

Chairman, 1992 Winter Clinic

Welcome to the 1992 Toronto Academy of Dentistry's Winter Clinic.

Our profession is undergoing dramatic changes. To meet the challenges of the 21st century we will learn new techniques, function as team players, and use ever-improving dental supplies and equipment. Winter Clinic can help us practise better dentistry today and in the future.

We have tried to make this day of continuing education as valuable and informative as possible.

We have placed an emphasis on "bread and butter" topics with state-of-the-art presentations aimed at different members of the dental team.

The commercial exhibits will display the latest products with technical experts on hand for problem solving. The exhibitors have also provided many draw prizes to be won. We truly appreciate the contribution of the exhibiting companies to the success of Winter Clinic. Please visit the booths and patronize the companies.

The Winter Clinic Committee consists of representatives from the dental industry, ODN&AA, ODHA, dentists and Raisyl and Pat from the Academy. They have worked very hard to create the excellent program described in this book. They deserve our sincerest thanks for a splendid effort.

In addition to everything else, Winter Clinic is a great time to socialize and get together with infrequently seen friends. Looking forward to seeing you at Winter Clinic.

GREETINGS FROM THE ONTARIO DENTAL NURSES AND ASSISTANTS' ASSOCIATION

LYNNE BRANDON, CDA/CDR,
PRESIDENT

The Ontario Dental Nurses and Assistants Association is pleased to welcome all dental assistants, dental receptionists and dental office managers and all dental assisting and dental reception students to the Toronto Academy of Dentistry's 55th Annual Winter Clinic.

We are fortunate indeed that the Toronto Academy of Dentistry's

Winter Clinic Committee is committed to providing this day of opportunity for professional continuing education. As integral members of the dental health care team, we are proud to accept the responsibility to make ourselves aware of new developments in all facets of dentistry.

Participate in this day, learn something new, take advantage as well to mix with others in your profession and renew old friendships.

WELCOME FROM THE ONTARIO DENTAL HYGIENISTS' ASSOCIATION

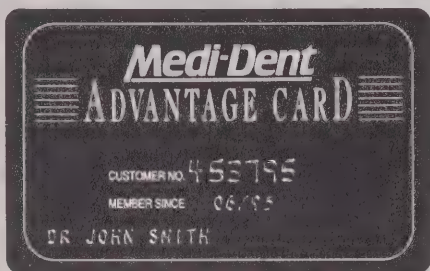

KATHLEEN FERES PATRY, PRESIDENT

Welcome to the Toronto Academy of Dentistry's 55th Annual Winter Clinic. I am proud to be participating with my fellow hygienists and dental colleagues. As professionals we want to excel for the mutual benefit of ourselves, our team mates and our patients.

Together we can all enjoy continuing education and camaraderie. On behalf of our members I

extend thanks to Raisyl Wagman, Barbara Greenglass and their respective committees for a stimulating and enjoyable program. I look forward to meeting you at the luncheon.

The Only Advantage You Need

The Medi-Dent Advantage Card sets you apart as a member of an elite group. Medi-Dent Advantage Card members have access to a pre-approved line of credit for the purchase of equipment, furnishings, leaseholds etc. in a quick, simple and easy to use process. Contact your Medi-Dent representative for full details; or if you wish please just mail or fax us back this ad and we will be happy to show you how you can gain the only advantage you will need.

The Future is

PHOT-X

2001 CP

Intraoral Dental X-ray

PHOT-X can provide "more efficient rays" and minimize the harmful "soft ray" exposure dose.

PHOT-X can reduce the initial skin exposure up to **23%** less at 60kVcp and up to **29%** less at 70kVcp compared to conventional 70kVp half-wave generator systems.

PHOT-X can also minimize exposure time up to **40%** at 60kVcp and up to **58%** at 70kVcp allowing for sharper motion free image.

Protection for children-Select 70kVcp. to minimize both exposure time and entrance exposure.

The efficiently penetrating photons produce radiographs of excellent clarity, sharpness contrast and definition.

PHOT-X image quality is outstanding as a result of Coradant Potentia Technology, small focal spot, and Belmont functional design.

Belmont, a leading X-Ray manufacturer.

PHOT-X is the result of a dedicated research and development program at Belmont, and an on-going factory testing program supported by Belmont Field Service and technical representatives.

For more information on the PHOT-X, contact your nearest Belmont Equipment Dealer or call Takara Company Canada Ltd, 2076 S. Sheridan Way, Mississauga, Ont., L5J 2M4.

Of all the things we make, this is the most important: The Dentsply Implant Division Promise.

The Dentsply Implant Division is a company committed to its customers.

Pioneering in spirit yet meticulous in development. Quality-conscious and service-oriented. Dedicated to the education of the industry through seminars and centers throughout the world.

We've even made it easier to get your prosthetic work done right the first time, every time, through our network of registered implant laboratories.

Above all, Dentsply Implant Division is an organization poised to give you exactly what you need to be successful. An organization equipped to help you give your patients what they want most of all: their smiles back.

For more information on the Dentsply Implant Division, contact your Customer Service Representative. Or call 1-800-877-9991.

You'll like what you see, we promise.

Because People Want Their Smiles Back.

INFECTION CONTROL IN DENTISTRY: 1992

JAMES A. COTTONE, DMD, MS

The demand for absolute standards for infection control in dental procedures is sweeping North America.

The Occupational Safety and Health Administration (OSHA) in the United States intends to enforce such regulations and the American Dental Association, believing them to be, in part, too stringent, will contest them in court.

Although the dental profession constantly improves upon its standards, nonetheless periodic bursts from the media target areas in question and focus, albeit with bias, on exceptions. The consequence is that many patients are now frightened to go to their dentists for reasons that are somewhat paradoxical.

Irrespective, the responsibility will rest with us. Dr. Cottone's presentation will be dealing with this crisis by pointing out with what in fact we are concerned, followed by reasonable means to intercept those matters.

SYNOPSIS

Practical infection control has been adopted by the dental profession in order to combat the threat of hepatitis, HIV infection and other infectious diseases to the health of the dentist, dental staff and patients.

Each of the following areas of infection control will be independently discussed during this program:

- Patient screening including the use of the medical history and recent events regarding HIV transmission in health care settings.
- Personal protection
- Instrument sterilization, surface disinfection, equipment asepsis, aseptic technique and laboratory asepsis.

The emphasis will be on technique selection, product evaluation and OSHA standards. A review of currently available infection control guidelines will be included. Handouts appropriate for a dental office infection control manual will be available.

BIOGRAPHY

Dr. James Cottone is currently Professor and Director, Division of Oral Diagnosis/Oral Medicine, Department of Dental Diagnostic Science, The University of Texas Health Science Center at San Antonio Dental School. He is internationally recognized for his work in viral hepatitis, AIDS and infection control as they relate to the dental profession in the past 12 years. Dr. Cottone has presented over 500 programs on these topics on the national and international level. He received an Assistant Secretary for Health Award from the US Department of Health and Human Services in 1989 for his contributions to the care and treatment of people with AIDS and HIV infection.

Dr. Cottone has an interest in forensic dentistry and was a Team Member which exhumed and identified Lee Harvey Oswald (1981), identified the remains of the Pan Am crash (1982) and the Delta crash (1985).

Dr. Cottone is the author of four texts and three monographs and is currently working on a new publication as well as having produced over 100 scientific papers and abstracts.

Among his many other involvements in associations and organizations Dr. Cottone is Consultant to the Centers for Disease Control on infectious diseases/infection control and Past Chairman, Office Sterilization and Asepsis Procedures (OSAP) Research Foundation.

AESTHETIC DENTISTRY FOR THE 90's — BONDING AND BLEACHING

DR. JAMES R. DUNN, D.D.S.,
ASSOCIATE PROFESSOR

SYNOPSIS

The contemporary dental practice treats a significant number of patients who specifically seek aesthetic procedures, and also expects that routine treatment improve both function and aesthetics. Bonding of materials to tooth structure and tooth bleaching are routine instruments of practice, but can be unpredictable. This

presentation will review both materials and techniques of bonding and bleaching, including dentin bonding agents, etching of enamel and dentin, direct composite bonding, ceramic bonding, amalgam bonding, porcelain repair and bonding to metals. The safety, efficacy and techniques of tooth bleaching using hydrogen peroxide gels and removing fluoride stains will also be discussed.

BIOGRAPHY

Dr. Dunn is a full time faculty at Loma Linda University, School of Dentistry, responsible for instruction of tooth morphology, dental photography, and composite and ceramic bonded restorations. He also is involved in biomaterial research in bonding materials and gives lectures and workshops both nationally and internationally on clinical aesthetic bonding treatments. Dr. Dunn received the 1992 Gordon Christensen Recognition Lecture Award presented by the Chicago Dental Society.

ALL DAY PRESENTATION

NUTRITION FOR THE 21ST CENTURY: THE DIET TO PROMOTE HEALTH AND PREVENT DISEASE

WARREN B. KARP,
PH.D., D.M.D., PROFESSOR

SYNOPSIS

This 5 hour seminar will review with you current principles of nutrition and how to apply these principles for bettering your own nutritional status and that of your patients as the 21st century approaches. Dr. Karp will present basic as well as practical approaches to nutrition.

The goals of this course are

threefold:

1. To make you aware of the most current nutritional recommendations.
2. To give you practical hints which will allow you to implement these recommendations for yourself, your family and your patients.
3. To teach you how to evaluate if you and your patients have been successful at following these guidelines.

BIOGRAPHY

Dr. Karp is presently a Professor in the Schools of Dentistry, Medicine and Graduate Studies at The Medical College of Georgia. He is Director of the Dental Hygiene and Dental Student Nutrition Course and is a member of the American Institute of Nutrition, The American Society of Clinical Nutrition and The Georgia Institute of Nutrition. Dr. Karp has a Ph.D. in biochemistry from the Ohio State University and a doctorate in dental medicine from The Medical College of Georgia. He is a licensed dietician in the State of Georgia and has published extensively in the areas of biochemical nutrition and has conducted research in fetal nutrition, fat metabolism, and mineral metabolism. Dr. Karp has lectured extensively and is known for his informative and lively style of speaking.

THE ENTIRE DENTAL TEAM.**

MAKING EVERY MINUTE COUNT: EFFECTIVE TIME MANAGEMENT FOR THE DENTAL OFFICE

(Morning Session — 9:00 - 11:30 a.m.)

**IMTIAZ MANJI,
B.SC.**

**DR. THOMAS
SNYDER, DMD, MBA**

SYNOPSIS

With today's hectic pace, it seems there's never enough time to do all that needs to be done. We keep getting busier yet the number of hours in the day remain constant. Whatever your role in the dental office, this seminar will teach you how to get more work done in less time, be it in your personal or professional life. It will teach you how to make every minute a productive one. Time management is the essence of productivity and this seminar will teach you to manage time.

Some of the things participants will learn are:

- Managing your time rather than time managing you
- Accounting for and tracking your time
- Setting realistic and achievable goals
- Productivity and profit
- Controlling interruptions
- Prioritizing
- Delegating tasks
- Team Management
- Case Management

UNDERSTANDING COMPUTERS • THEIR TECHNOLOGY AND APPLICATIONS

(Afternoon Session — 2:15 - 4:45 p.m.)

SYNOPSIS

Many dentists today are replacing their current dental system or

purchasing office computers for the first time. Dentists often become confused and postpone their decision to automate when faced with the hundreds of dental software programs available to choose from. This presentation will outline a strategy for computer selection based on cost considerations and practice suitability.

Some of the topics to be presented are:

- The terminology to effectively communicate with hardware and software vendors and suppliers
- Making effective hardware component decisions for performance, reliability, and upgrading in a cost effective way
- Price and performance decisions made easy
- Comparing and contrasting dental computer software applications
- Assessing a computer vendor's strengths and weaknesses
- Preparing for a vendor
- Negotiating with the vendor
- Understanding hidden costs
- Effective contract negotiations to protect your investment

BIOGRAPHIES

Imtiaz Manji, is known throughout North America as an educator and a consultant with a special interest in high technology. Having worked with over 800 dental offices across North America, Mr. Manji has developed a practical down-to-earth approach to dental management. He is the President and founder of ExperDent Consultants Inc. Participants of his seminars and readers of his column in the CDA Journal are rewarded with hands-on advice which they can apply on a daily basis.

Dr. Thomas Snyder, who is regarded as one of the leading practice management consultants in the U.S., has presented hundreds of lectures across America, speaking on a number of topics including the role of computers in dentistry, practice financial management, practice transition and the integration of technology. He is the co-editor of the seven volume series, Dental Practice Management, and co-author of the first comprehensive dental practice management textbook, Dental Practice Management. He also serves as an editorial advisor for several U.S. dental publications.

Time: 9:00 - 11:30 a.m. and 2:15 - 5:00 p.m.

Room: 206B

Chairman: Dr. Richard Nurgitz

The Academy of Dentistry thanks Domtrack Computers, Exan Consolidated Transactions, Abel Computers, CUSP Sable Computer Inc. and Excel/Doms for their participation.

CERAMIC RESTORATIONS

HOWARD KLAIMAN, D.D.S.

PROSTHODONTIST

SYNOPSIS

Dr. Klaiman's lecture on Ceramic Restorations will include an up to date presentation of the systems which are currently available that use ceramics to restore teeth.

The following systems will be discussed:

1. Cast Glass System — Dicor
2. Porcelain System — In Ceram, Renaissance
3. Cad Cam System

BIOGRAPHY

Dr. Klaiman received his degree in Prosthodontics in 1990 from Boston University. He is presently a Clinical Instructor in the Department of Prosthodontics at the Faculty of Dentistry, University of Toronto. Dr. Klaiman maintains a private practice in restorative and prosthetic dentistry. He has presented lectures for the Alpha Omega Fraternity, Toronto Alumni Chapter; the Ontario Dental Association's Spring Convention and also at Boston University.

Time: 10:15 - 11:15 a.m. and 3:30 - 4:30 p.m.

A MATERIAL REVOLUTION: HOW NICKEL TITANIUM IS REPLACING STAINLESS STEEL IN ENDODONTICS

BARRY KORZEN, D.D.S.
MORNING SESSION ONLY

SYNOPSIS

Nickel Titanium is a superelastic alloy which is 500% more flexible and 10 times stronger than stainless steel. Long used in medical applications because of its unique qualities, this material is now being used as the basis for revolutionary instrumentation and obturation techniques in endodontics. This lecture will trace the applications now being utilized.

BIOGRAPHY

Dr. Korzen was formerly Associate Professor and Head of Endodontics, Faculty of Dentistry, University of Toronto. He is currently Active Staff, Department of Dentistry, Mount Sinai Hospital, Toronto. Dr. Korzen maintains a private endodontic practice in Toronto.

THE ACADEMY OF DENTISTRY ACKNOWLEDGES THE SPONSORSHIP OF DR. KORZEN'S LECTURE BY ADVANCED ENDO-DONTIC CONCEPTS (CANADA).

SMARTEN UP! — SHARPEN UP!

**TRUDY SHORT,
R.D.H., M.S.**

**RECIE MOBLEY,
R.D.H., B.S.**

SYNOPSIS

Frustrated by dull instruments? Refine your instrument sharpening skills in this 3-hour hands-on workshop. Both stationary stone/moving instrument and moving stone/stationary instrument techniques will be demonstrated. Focus will be on sharpening the straight sickle, curved sickle, universal curette and Gracey series. Sharpening supplies, facility needs and other sharpening tips will be shared.

BIOGRAPHIES

Trudy Short began as a practicing dental hygienist and now manages training and organizational development at Lyne-Western Co., Mission Woods, Kansas. Trudy has a B.S. in Dental Hygiene and M.S. in Adult Education and Training. Throughout her career, she has developed effective training and organizational development programs for many companies and organizations, as well as developing the program she will present.

Trudy has provided marketing consulting and training for dental professionals in the U.S., Canada, Europe and Japan.

Recie Mobley is experienced in private practice, public health and dental hygiene education. She is a strong advocate for growth in the profession of dental hygiene and as such has lectured in the U.S. and internationally as well as presented workshops for the ADHA on the Future of Dental Hygiene. Recie worked with Trudy Short as a technical advisor for the Smarten-Up Sharpen-Up Videotapes.

YOU MUST PRE-REGISTER WITH THE SEPARATE FORM AT THE FRONT OF THIS PROGRAM BOOK.

PAIN AND DISCOMFORT IN THE MUSCULOSKELETAL SYSTEM AMONG DENTISTS

HEATHER GORDON, B.SC., P.T.

SYNOPSIS

The prevalence of musculoskeletal pain and discomfort among dentists has increased. This presentation will focus on prevention and management of these conditions. A vast array of current information from dental ergonomics to office exercise programs will be discussed as well as the differences in the musculoskeletal system between the sexes.

The **Morning Session** will specifically cover headaches, neck and shoulder problems. In the **Afternoon Session**, Heather will introduce the highly controversial subject of low back pain.

BIOGRAPHY

Heather Gordon is a physiotherapy graduate from McGill University with a private practice in Toronto, treating exclusively those with cervical and TMJ disorders. She is a lecturer at the Faculty of Dentistry, University of Toronto as well as a frequent presenter on Physiotherapy and TMJ at the ODA Spring Convention and the Academy of Dentistry's Winter Clinic. Heather travels around Ontario lecturing to physiotherapists and dentists on the treatment of these patients.

DIAGNOSIS AND MANAGEMENT OF FACIAL PAIN: NEW PERSPECTIVES ON INTERNAL DERANGEMENT AND POST-TRAUMATIC TMD

HOWARD C. TENENBAUM,
D.D.S., D. PERIO., Ph.D.

SYNOPSIS

This presentation will focus on characteristics of the history-taking and examination processes used for differential diagnosis of facial pain. Particular attention will be focused on assessment of internal derangement by use, and comparison of sagittal recording of TMJ motion, arthrography, MRI and clinical examination.

Dr. Tenenbaum will also present recently published data which demonstrates the difficulty in the diagnosis and management of post-traumatic temporomandibular disorder.

BIOGRAPHY

Dr. Tenenbaum currently maintains a private practice in Periodontics at Mount Sinai Hospital. He is an Associate Professor (Full-Time) in the Department of Periodontics, Faculty of Dentistry, University of Toronto as well as the Department of Pathology in the Faculty of Medicine, University of Toronto. Dr. Tenenbaum is also a staff scientist in the Samuel Lunenfeld Research Institute at Mount Sinai Hospital and is Head of the Division of Periodontics, Department of Dentistry, Mount Sinai Hospital.

CASE SELECTION AND TREATMENT FOR THE MIXED DENTITION

**STANLEY H. WAESE,
D.D.S.
ORTHODONTIST**

**WILLIAM Z. DAYAN
D.D.S.
ORTHODONTIST**

SYNOPSIS

Dr. Waese and Dr. Dayan will present this topic in five parts:

1. Crossbites
2. Habits and Speech Difficulties
3. Overjet
4. Overbite and Openbite
5. Crowding and Space Maintenance

The emphasis will be placed on case selection and appliance design. Dr. Waese and Dr. Dayan will provide a handout with sample prescriptions of the specific appliances that are discussed during their presentation.

BIOGRAPHIES

Dr. Stanley Waese maintains a private orthodontic practice in North York. He is the author of articles on functional appliances and TMJ therapy and has lectured on orthodontic aspects of surgery, interceptive care and TMJ behaviour modification.

Dr. William Dayan is a Clinical Orthodontic Instructor at the Faculty of Dentistry, University of Toronto. He also maintains a private orthodontic practice in North York.

ZAP! POP! WHOOSH! — ADVANCED DENTAL TECHNOLOGIES

GEORGE A. FREEDMAN, D.D.S.

SYNOPSIS

Recent developments have expanded our horizons in the delivery of dental care. Four decades of the high-speed drill are giving way to laser therapy, plasma surgery, and kinetic preparation.

Soft tissue procedures are more specific, precise, and localized. Healing is faster and more predictable. Post-operative infections are

minimized. Hard tissues are debrided more rapidly and with less patient discomfort. The use of local anaesthesia can often be eliminated.

As dental procedures are made better, faster and easier to tolerate, patient acceptance and cooperation increase. These techniques offer conservative treatment modalities that benefit both the patient and the dentist, and ultimately improve the parameters of care.

BIOGRAPHY

Dr. Freedman received his B.Sc. and D.D.S. (1978) from McGill University in Montreal. He has a special interest in Cosmetic Dentistry and has lectured extensively in Canada and the U.S. In 1991 Dr. Freedman was President of the American Academy of Cosmetic Dentistry and was also appointed Adjunct Associate Professor, Case Western Reserve University (a position he currently maintains) and Director, Post-Graduate Program. In April of 1992 Dr. Freedman was the recipient of an Honorary Life Membership in the Accademia di Estetica Dentale, Italiana. As well as publishing many articles and contributing to the Encyclopaedia Britannica's Medical & Health Annual, Dr. Freedman has been a consultant to a large number of dental manufacturing companies. Non-dental interests include squash, scuba-diving, skiing and collecting modern art.

Dr. Freedman currently maintains a private practice in Markham, Ontario and has a special interest in esthetic dentistry.

TAX STRATEGIES FOR INCREASING PERSONAL INCOME

DR. JERRY WHITE

C. PAUL TINDALL

SYNOPSIS

Dr. Jerry White and Mr. C. Paul Tindall will be discussing the following topics:

- How to Tax Shelter Your Income from the new Provincial Budget
- How You Can Still earn 15-20% Annual Returns Despite Low Interest Rates, and Save Taxes
- Why a Personalized Strategy and Long-Term View are the Two Key Principles for Investment Success
- How to Take Full Advantage of the New RRSP Rules and Pay Less Tax
- **1992 Trends** for Interest Rates, Mutual Funds and Real Estate
- How an Independent Financial Counsellor Can Be Your Most Important Ally in Building Personal Wealth
- **Tax Shelter** Options — Good and Bad

BIOGRAPHIES

Dr. Jerry White is the Business Editor of CHFI FM 98 and Canada's most published business author. He is on "The Jerry White Business Report" throughout the U.S. and CNBC-TV. Educated in Toronto and London, England, Dr. White holds a Master of Business Administration degree, an M.A. in Economics and a Doctor of Literature in Strategic Planning. His business career as an executive, president, owner/manager, and academic spans 25 years in banking, public accounting, publishing, consulting and food service. As well, Dr. White is a former professor of Entrepreneurial Studies in the Faculty of Management, University of Toronto. He is Chairman of J. White & Associates Inc., Strategic Advisors to Management.

C. Paul Tindall is Vice President and Director of Fortune Financial Corporation and Chairman of the Board, Tindall Group Inc. He is Former President of Money Strat Securities, in Toronto. Mr. Tindall has been a featured guest speaker for dental society meetings throughout Ontario. He holds membership in the Canadian Association of Financial Planners.

VIOLENCE AGAINST WOMEN

SUSAN NOSOV

Susan Nosov has been active in the anti-violence movement for nearly 15 years. During this time, she has worked as an advocate and counsellor for assaulted women and children and is currently teaching in the Assaulted Women and Children's Counsellor/Advocate Program at George Brown College. She has an extensive background in counselling women and children who have been abused sexually, physically and emotionally.

Susan also has several publications and papers which have been printed on these topics — Education for Change; Jewish Women Confronting Racism in Feminist Collectives, Child-Sexual Abuse, and Understanding Sexual Assault and Acquaintance Rape, just to name a few.

Susan holds a Masters of Education Degree from OISE as well as a Specialized Honours B.A. — Women's Studies. Her lecture will cover an extensive overview of violence against women, how to best help a survivor of violence, as well as criminal justice and police issues.

THIS LECTURE IS SPONSORED BY THE ONTARIO DENTAL ASSOCIATION'S DENTISTS AT RISK COMMITTEE

BOOTH NO. 711

You've mastered one, we'll help you handle the other.

You've mastered the tools of your profession, but without an understanding of the tools of finance the success of your practice can be placed in grave danger.

In today's economic and social climate, the Business of Dentistry is as important as your formal graduate training. In fact, a business mistake today in either your professional or personal world may have a devastating effect far into the future.

Consequently, business jargon such as R.O.I. (Return on Investment), Net Profit and Opportunity Costs of Money are now becoming part of the professional's vocabulary.

We at Healthgroup Financial are in the business of making sure you don't make a mistake by providing expert advice and financial products to satisfy both your personal and professional needs.

If you are considering adding new

equipment, expanding your present facilities, building or purchasing a building, selling all or part of your practice, buying or setting up a practice, retiring or associating, you owe it to yourself to talk to the professionals who care about your future.

PERIODONTAL AND PROSTHETIC TREATMENT PLANNING: THE INFLUENCE OF DENTAL IMPLANTS

MURRAY ARLIN, D.D.S., F.R.C.D.(C)

Time: 9:00 - 9:45 a.m.

SYNOPSIS

The success of osseointegrated dental implants has added a new dimension to periodontal and prosthetic treatment planning. The availability of predictable implants can drastically modify the treatment. This presentation will show several clinical cases where incorporation of implants influenced the overall periodontal and prosthetic treatment plan.

BIOGRAPHY

Dr. Murray Arlin maintains a full-time practice in Weston, Ontario in Periodontics and the surgical phases of implant dentistry.

TREATMENT OF ANTERIOR TEETH WITH ADVANCED ATTACHMENT LOSS

DAN INDECH, D.D.S.

Time: 10:00 - 10:45 a.m.

SYNOPSIS

Difficult challenges in periodontics and restorative dentistry arise when one is confronted with anterior teeth with advanced attachment loss. Functional rehabilitation in combination with preservation or improvement of cosmetics is a goal that we must attempt to achieve.

Contemporary periodontal procedures including root coverage grafts, ridge augmentation, guided

tissue regeneration and implantology allow us to achieve our goals.

Dr. Indech will demonstrate how careful case planning, open lines of communication and a coordinated multidisciplinary approach provides for smooth delivery of treatment, satisfied practitioners and happy patients.

MINI CLINICS *continued*

BIOGRAPHY

Dr. Indech practises Periodontics in Toronto and holds many professional memberships including the Osseointegration Study Club of Ontario and the Ontario Society of Periodontists.

THE MANAGEMENT AND RESTORATION OF FURCATED MOLARS

ELLIOTT A. WEINSTEIN, B.SC., D.D.S.

Time: 11:00 - 11:45 a.m.

SYNOPSIS

Topics to be discussed include furcation invasion and its predisposing factors. Emphasis will be placed on the goals of treatment as well as the various treatment modalities available, their indications and contraindications, and their prognoses.

BIOGRAPHY

Dr. Elliott Weinstein maintains a private practice in downtown Toronto devoted to periodontics

and implantology. He is a dental graduate of McGill University and received his postgraduate training at The University of Toronto.

PLACEMENT OF IMMEDIATE IMPLANTS AT THE TIME OF TOOTH EXTRACTION AND THE USE OF GORTEX TO GENERATE BONE AROUND IMPLANTS

ARNOLD FLEMING, D.D.S., D.PERIO., M.SC.

Time: 2:15 - 3:00 p.m.

SYNOPSIS

Advances in implant therapy now allow for the placement of root form implants into extraction sockets at the time of tooth extraction. Furthermore, Gortex and bone graft materials can be used to generate bone around exposed portions of implants where there was not enough natural bone available. This seminar will use clinical cases to demonstrate the prosthetic and surgical

MINI CLINICS *continued*

aspects of immediate implants, including single tooth implants, PBM bridges on immediate implants and full arch reconstruction on immediate implants.

BIOGRAPHY

Dr. Fleming's research for his combined M.Sc/Diploma program in Periodontics at the University of Toronto was on immediate implantation using a new plasma-sprayed implant developed at U. of T. and on guided tissue regeneration procedures. He has been a clinical instructor and guest lecturer in periodontics and implantology at U. of T. and maintains a full time private practice in Toronto. Dr. Fleming has been working with Branemark and Core-Vent implants for the past 5 years.

GUMS "R" US — OR — IT'S WHAT'S UP FRONT THAT COUNTS

ALAN WINNICK, D.D.S., F.R.C.D.(C)

Time: 3:15 - 4:00 p.m.

SYNOPSIS

With the rapid introduction of "Restorative Materials of the Month", attention must be given to periodontal aesthetics. The rationale for ridge augmentation by soft and hard tissues will be explained. These include augmentation of clefts and ridge defects by gingival and connective tissue grafts and bone augmentation by guided tissue regeneration. Periodontics

has now passed through the era of resective and is well into the age of augmentation and regeneration.

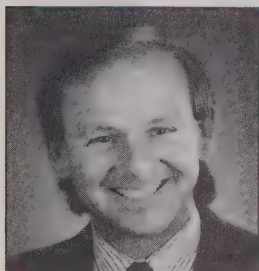

BIOGRAPHY

Dr. Winnick is currently an Associate in Dentistry at the Faculty of Dentistry, University of Toronto and at the University of Pennsylvania. He is also a Clinical Assistant Professor in Periodontology at the University of Pennsylvania and on staff in the Department of Dentistry, Mount Sinai Hospital, Toronto. Dr. Winnick maintains a private practice in Periodontics in Toronto.

PERIODONTAL TREATMENT PLANNING IN THE 90'S

JON PERLUS, B.SC., D.D.S.

Time: 4:15 - 5:00 p.m.

SYNOPSIS

With the development of new treatment modalities, diagnosis and treatment planning for periodontal care has changed.

Dr. Perlus will discuss how current approaches affect treatment planning. Simple and complex cases will be reviewed from the specific to the total case aspect. It will allow the general practitioner to take to the office a better understanding of current periodontal approaches.

BIOGRAPHY

Dr. Perlus maintains a private Periodontic practice in Toronto. He is a staff member at the University of Toronto, Faculty of Dentistry. Dr. Perlus has served as President of the North Toronto Dental Society and represents that society as a governor to the ODA Board. He is a member of the ODA's Dental Benefits Trustees Committee as well as the D.P.A.C. Committee.

HONOURARY LIFE MEMBERSHIP

GORDON PERLMUTTER,

D.D.S., F.I.C.D., F.A.G.D.

The Toronto Academy of Dentistry is pleased to recognize Dr. Gordon Perlmutter as the recipient of the 1992 Honourary Life Membership.

Dr. Perlmutter was born in Poland in 1926 but in December of that year he and both his parents arrived in Halifax to find their collective future in Canada, and then proceeded to settle in Toronto. Dr. Perlmutter received his formal education in Toronto, public and high school (Harbord Collegiate), and graduated from the University of Toronto, Faculty of Dentistry in 1950.

Dr. Perlmutter's student career was unremarkable, but did include his association with Alpha Omega International Dental Fraternity, which gave him the first taste of involvement in activities ancillary to dentistry as a life style. His participation in his fraternity was juggled between his commitment to his studies and his other employment as a baker, but the sense of commitment to matters which he feels are important was nurtured and reinforced. Among other meaningful projects of Alpha Omega, Dr. Perlmutter discovered the annual convention of his fraternity two years prior to graduation, and this has become the finale of each year ever since.

Dr. Perlmutter's formal dental education has been ongoing since graduation, both as a perpetual student and sometime teacher. He has taken short graduate courses either at local meetings sponsored

continued

by local societies in Toronto and elsewhere in Ontario, to much farther afield. These include: University of Toronto; University of Western Ontario; University of Michigan, Tufts University in Boston, and State University of New York at Buffalo.

Dr. Perlmutter has added to his own education by presenting lectures and table clinics during his years in practice, to The North Toronto Dental Society; The Toronto Academy of Dentistry; The Toronto Crown and Bridge Study Club; The Ontario Dental Association; Federation Dentaire Internationale; Chicago Dental Society Midwinter Meeting; The Thomas Hinman Meeting in Atlanta; Alpha Omega Toronto Alumni Chapter and Undergraduate Chapter, and Alpha Omega's Russian Retraining Program. In addition, some thirty clinical and editorial articles have been published.

Dr. Perlmutter's service to the community includes volunteer service as a working dentist for the Loyal True Blue and Orange Home for Orphans, The Bloor Street Dental Clinic, and Elm Tree Nursing Home. For eight years he served the North York Public Health Department in the Public Schools, and was on staff at Mount Sinai Hospital and Baycrest Centre for Geriatric Care for thirty years where he was attending staff. Dr. Perlmutter has also been part time faculty at the University of Toronto, Faculty of Dentistry as Preclinical Instructor, Clinical Instructor, and Student Candidate Interview Team Member.

Dr. Perlmutter's ongoing affiliations in organized dentistry include the North Toronto Dental Society in which he served as Mediations Chairman and President; The Toronto Academy of Dentistry as Mediations Chairman, Winter Clinic Chairman and President, and the Crown and Bridge Study Club as Chairman.

Dr. Perlmutter has been very active in the Ontario Dental Association and has served on many committees including: Membership; Mediations, following his co-chairmanship of the Committee originally created to establish our Mediations Program; Convention Committee, (now the Spring Meeting Committee, which he led as Chairman in 1980 and again in 1990; and currently as Chairman of the Constitution Committee. Dr. Perlmutter has also been a Governor to the Board for six years and Chairman of the Host Committee for the past two years.

Past and ongoing memberships also include the Chicago Dental Society, American Dental Association and Canadian Dental Association. Dr. Perlmutter is still an active member of the Alpha Omega International Dental Fraternity and Toronto Alumni Chapter of Alpha Omega, and has served as President of both organizations. Recently he was made recipient of his local chapter's Achievement Award, and is a Fellow of both the International College of Dentists and the Academy of General Dentistry.

This pattern of involvement in the various facets of Dr. Perlmutter's profession has prevailed since before his marriage to Estelle in 1953, and continues to this day. The growth of his family in the intervening years with the arrival of Philip, and ultimately his wife Robin and son Sam; Sharon, who is now associated happily in his General Practice, and Nancy with her husband Bernard Soicher and their daughter Paige, did not apparently reduce his enthusiasm. Indeed, their constant support, particularly that of Estelle, whose understanding and encouragement really made it all possible, indicates Dr. Perlmutter's pride in sharing this award with his family.

SUMMARY OF GROUP CLINICS

DR. JAMES COTTONE

Infection Control in Dentistry: 1992

ALL DAY SESSION —

Exhibit Hall "B"

9:00 - 11:30 a.m. and 2:15 - 4:45 p.m.

NEW VISTAS IN DENTISTRY

Presented by

DR. DAVID GARBER

Atlanta, Georgia

NEW VISTAS AND NEW TECHNIQUES = NEW OPPORTUNITIES

Especially for dentists practising in the communities serviced by the Toronto Academy of Dentistry, the evolution of restorative dentistry from a function emphasis to an esthetic functional emphasis is progressing rapidly. Dr. Garber's program explores this new standard and provides the practical and tangible means to incorporate it in your practice today!

These new techniques demand the integration of various disciplines of dentistry:

- PORCELAIN LAMINATE VENEERS AND THE NEW VENEER BRIDGES
- ETCHED PORCELAIN INLAYS — Alternatives in the Amalgam Controversy
- NEW CROWN SYSTEMS
- BONDING TO DENTIN, ENAMEL, PORCELAIN, & METAL
- RESIN BONDED BRIDGES
- ETCHED PORCELAIN "PIECES"

Dr. Garber's dual specialty training in fixed prosthodontics and periodontics permits the expansion of conventional approaches to restorative dentistry. Utilizing an exquisite graphics display he will demonstrate how to incorporate these techniques into your practice:

- HOW TO MIX AND MATCH CONVENTIONAL BRIDGEWORK WITH RESIN BONDED RETAINERS AND PORCELAIN LAMINATE VENEERS WITH THE NEW CERAMIC SYSTEMS — LIKE CREATION AND SURPRISE
- HOW TO UTILIZE SIMPLE PERIODONTAL PLASTIC PROCEDURES TO AUGMENT RESTORATIVE EXPECTATIONS

continued

Dr. Garber will describe how to use COMPUTER IMAGING effectively, utilizing a 10-foot screen. Additionally he outlines the myths, magic and mysteries of LASERS, and how COMPUTERS will play an ever larger role in dental practice. All this technology and the techniques they spawn can instantly increase your patient flow.

THIS COMPREHENSIVE PROGRAM EMPHASIZING
"THE BEAUTIFUL SMILE"
IS RELEVANT TO THE GENERALIST
THE SPECIALIST, AND THEIR AUXILIARIES.

Dr. Garber graduated from the University of Pennsylvania with a post-graduate degree in Periodontal Prosthesis. Currently he is Clinical Professor of Prosthodontics as well as Clinical Professor of Periodontics at the Medical College of Georgia School of Dentistry. Dr. Garber has authored many articles and books, has lectured worldwide and is well-known and respected for his work in the field of esthetic dentistry.

Use the enclosed registration form to register now or register at the Public Relations Desk on the day of Winter Clinic. Reduced fees are being offered for those who register on the day of or before the Winter Clinic.

Healthco (Canada) Ltd. — *Low Net*
Caulk Canada — *Closest to the Hole*
Pottruff and Smith Insurance Brokers — *Longest Drive*
Kodak Canada — *Best Senior*
Bausch & Lomb — *Low Gross - Academy Member*
Cantel — *Draw Prize*

EMERGENCY SERVICE

The Academy offers a daytime referral as well as after hours emergency service.

During the day have patients call **967-5649** and they will be referred to a dentist who will take emergencies. If a patient calls **967-5649** after hours, an answering machine will give them the number of the after hours answering service for emergencies.

AFTER HOURS:

Monday - Friday — 4:30 p.m. - 1:00 a.m.

*Saturday, Sunday, Holidays —
9:00 a.m. - 1:00 a.m.*

The telephone number which is picked up after hours is **924-8041**.

If you are interested in becoming a member of the Emergency Service, and you practise in Metropolitan Toronto, please call the Academy office at 967-5649.

Dr. Flavio Turchet & Dr. Ron Richardson
Chairmen, Emergency Service

ASSOCIATE PLACEMENT SERVICE

The Academy offers a Placement Service for those looking for an associateship or those requiring an associate.

If you need assistance, please contact the Academy office at 967-5649.

FLUORIDATION

1963 - 1993

Next year marks a significant milestone for preventive public health services in Ontario. November 1993 represents the 30th anniversary of the fluoridation of the communal water supply of Metropolitan Toronto.

This proven public health measure is still regarded as a safe, efficient and cost-effective method of decreasing the incidence of dental disease among all segments of the population, thereby decreasing the cost of dental repair.

During the past 30 years, the oral health of Metropolitan Toronto residents has improved considerably. Fluoridation has played a major role in this improvement. For example, DMF rates for 13 year olds have decreased from the 1972 level of 5.30 to 1.72 in 1991. DMF rates for other age groups show similar improvement.

This improvement, however, is not as great as might be expected. This is due, in large part, to the increasing number of new immigrants living in the area. These individuals would not have received the long term benefits of fluoridated communal water supplies.

As well, the added benefits of communal water fluoridation may not be as high as they once were. This is primarily due to the wide-spread use of fluoride-containing toothpastes and oral rinses, as well as the higher level of knowledge about good nutritional and other life-style practices.

It is estimated, however, there would still be an additional 20-25 percent decrease in the incidence of dental disease if appropriate levels of fluoride were added to existing non-fluoridated communal water supplies.

It is hoped that non-fluoridated Ontario communities will recognize the obvious benefits gained by this public health measure and will follow the example set by Metropolitan Toronto nearly three decades ago.

PAST PRESIDENTS OF THE TORONTO ACADEMY OF DENTISTRY

The Past Presidents of the Toronto Dental Society are identified as Past Presidents of this Academy. Below is a list of Past Presidents from 1891 to 1992.

1891-92	N. Pearson*	1942-43	Lloyd M. Grose*
1892-93	J.B. Willmott*	1943-44	Charles McLean*

WHAT WILL HAPPEN TO YOUR OFFICE IF YOU ARE ARE SICK OR DISABLED?

ACADEMY OF DENTISTRY MUTUAL AID PLAN

This is a group of dentists who will help a member of the group at a time of distress. Ideally the group will number about twenty, but the number fluctuates as people join and leave. If you are a member of this group, and are unfortunate enough to be unable to practise because of illness or accident, the members of the group will take turns in operating your practice, with your auxiliaries, to a maximum of four days per week, for a number of weeks. This will provide service for your patients in case of emergencies, completion of treatment in progress and maintain the flow of recall patients.

Some of the benefits are, maintaining service availability to your clientele and employment for your auxiliaries as well as preventing the formation of a huge backlog of patients waiting for your return. If it becomes necessary for a practice to be sold, the plan can maintain the viability of the practice until the sale can be completed. The other members of the plan will come to your office one day at a time, on a rotating schedule. If the group numbers 20, the remaining 19 dentists would be responsible for about one day each, every five weeks for each disabled dentist. Fees are charged in the usual way at the stricken dentist's office, and the contributing dentist does not receive compensation.

The plan has been available for several years and has worked well to date for the stricken dentist. You might want to ask a friend or two to consider joining, or perhaps start a whole new group. A set of by-laws has been adopted, but they can be changed if the need arises.

Further details and a copy of the by-laws are available at the Academy office - 967-5649 or by calling Berril Garshowitz, 229 Yonge Street, Ste. 213A, Toronto, M5B 1N9, telephone 368-3375.

ENTER THE PHOTOGRAPHY CONTEST.*

MEDIATIONS COMMITTEE REPORT

The members of the Toronto Academy of Dentistry are fortunate to have the Mediations Committee which is the impartial friend to the dentist and the patient. Patients are sometimes dissatisfied with the treatment they receive or the fee they have been charged. Problems can also occur when personalities clash or when there is a lack of communication between the dentist and the patient. Our mediations members are dedicated dentists who negotiate and attempt to settle differences in an informal, non-legal manner and with a minimum of strife.

At the November Board Meeting of the Ontario Dental Association, the Implementation of Treatment Verification was approved. Treatment Verification is a process designed to assist insurance companies in ascertaining whether certain procedures have been carried out as per the submitted patient claim form. This audit most often arises when dentists accept assignment and when patients become aware of the fee that was charged for the service they received and are dissatisfied with their treatment. The Mediations Committee has now become involved with this type of audit and all dentists should be aware of this procedure. The operation of a practice today is radically different from in the past. We must strive for excellence in our work and show courtesy and respect in what we say, and to one another. When these single words and thoughts are extended to our patients, they will think twice before writing a letter of complaint to the Academy.

In conclusion, I would like to express thanks to the members of the Mediations Committees and the Academy office staff for their assistance in helping to carry out the mediations procedure.

Dr. Gilbert Chapnick
Mediations Consultant to the
Toronto Academy of Dentistry

PREVENTIVE...

The concept of Preventive Dentistry has reshaped the direction of dentistry. The same concept of prevention can be applied to most equipment in today's dental office.

In fact, many dental offices already have ***PREVENTIVE MAINTENANCE PROGRAMS*** for... computers and photocopiers.

Applying a well organized ***Program of Preventive Maintenance*** to your Dental Equipment makes sense for the very same reasons.

Our Preventive maintenance agreement includes:

- 12 Monthly preventive maintenance visits
 - 12 Supplementary service visits
 - N/C for labour at local repair facilities
 - 10% Discount on all parts & factory repairs
 - 50% Discount on labour not covered by agreement
 - Yearly calibration of panoramic & intra-oral x-rays
 - Chemical cleaning of film processor as required
 - Equipment/office evaluation & summary
 - Personalized service - one technician for your office
- NO RISK CANCELLATION POLICY
 - N/C consultation assistance with maintenance & operation procedures for dental equipment.
